

EVALUATING JOURNAL PERFORMANCE

3 September 2012

KOH AI PENG
LIBRARIAN

EVALUATING JOURNAL PERFORMANCE

This workshop will give you hands-on to evaluate your journals using two evaluation tools, namely JCR and SCImago.

Journal Citation Reports (JCR) is to evaluate journals indexed in ISI Web of Science and SCImago is for journals indexed in Scopus.

What if your journals are not indexed in ISI Web of Science or in Scopus? You will be shown how to evaluate your journal performance using the cited references in ISI Web of Science.

JOURNAL PERFORMANCE

CHARACTERICS OF A QUALITY JOURNAL

- ✓ High standards for acceptance of manuscripts (acceptance / rejection rate)
- ✓ A broadly representative editorial board (expertise / diversity / internationalization)
- ✓ A critical refereeing system
- ✓ Coverage by major abstracting & indexing services
- ✓ High confidence level of scientists in the contents (Reputation – EIC, publisher, publishing community)
- ✓ High frequency of citation by other journals / articles (citation analysis)

http://thomsonreuters.com/products_services/science/free/essays/journal_selection_process/

HOW TO MEASURE JOURNAL PERFORMANCE

1. QUALITATIVE METHODS

2. QUANTITATIVE METHODS

QUALITATIVE METHODS

- ▶ **Expert Surveys** – panels of a group of expert scientists.

Eg. The Association of Business Schools' academic Journal Quality Guide, Excellence in Research for Australia (ERA)

http://www.arc.gov.au/era/era_2012/era_journal_list.htm

- ▶ **Peer Reviews**
- ▶ **Prestige of Journals** – EIC, publisher, publishing community

QUANTITATIVE METHODS

- **Circulation & Usage statistics – readership testify quality**
- **Acceptance & Rejection Rates – high rejection rate > prestigious**
- **& ...**

Quantitative Methods

Essays of an Information Scientist, Vol1, p.527-544, 1962-73 Reprinted from :Science, (178):471-479, 1972

Citation Analysis as a Tool in Journal Evaluation

Journals can be ranked by frequency and
impact of citations for science policy studies.

Also see: [Citation frequency and citation impact -- and the role they play in journal selection for Current Contents and other ISI services.](#)

Eugene Garfield

(NOTE: The article reprinted here was referenced in the essay which begins on page 409 in Volume 1. Its inadvertent omission was discovered too late to include it at its proper location, immediately following the essay.)

As a communications system, the net- | quinquennially, but the data base from
work of journals that play a paramount | which the volumes are compiled is

Quantitative Methods - Citation Metrics

- a. **Journal Citation Reports (JCR)** – journals indexed in Web of Science (Impact Factor, Journal Immediacy index, Eigenfactor, Article Influence)
- b. **SCIMago Journal Rank Indicator (SJR)** – journals indexed in Scopus (SJR, h-index)
- c. **Publish or Perish** – Google Scholar

1. JOURNAL CITATION REPORTS

- Journals indexed in Web of Science
- Publish yearly
- Fee based – subscription
- Main indicator: Impact Factor, Immediacy Index, Eigenfactor, Article Influence

JOURNAL CITATION REPORTS

Web-based research tool published by Thomson Reuters that allows you to evaluate and compare journals using citation data drawn from approximately 12,000 scholarly and technical journals and conference proceedings from more than 3,300 publishers in over 60 countries.

JOURNAL CITATION REPORTS

<http://webofknowledge.com> Click on Additional Resources, under Analytical Tools - choose Journal Citation Reports

The Welcome page is the starting point for finding the journals that you want to analyze. Select a JCR edition, a year to search, and a journal search option. The options you select from this page determine which page appears next.

Journal Citation Reports®

[Information for Ne](#)

Select a JCR edition and year:	Select an option:
<input checked="" type="radio"/> JCR Science Edition <input type="text" value="2011"/>	<input type="radio"/> View a group of journals by <input type="text" value="Country/Territory"/>
<input type="radio"/> JCR Social Sciences Edition <input type="text" value="2011"/>	<input checked="" type="radio"/> Search for a specific journal <input type="text" value="Subject Category"/>
	<input type="radio"/> View all journals <input type="text" value="Publisher"/>
	<input type="text" value="Country/Territory"/>
<input type="button" value="SUBMIT"/>	

JOURNAL CITATION REPORTS

Journal Impact Factor: the average number of times articles from the journal published in the past two years have been cited in the JCR year.

Immediacy Index is the average number of times an article is cited in the year it is published.

-- indicates how quickly articles in a journal are cited

Eigenfactor Score calculation is based on the number of times articles from the journal published in the past five years have been cited in the JCR year, but it also considers which journals have contributed these citations so that highly cited journals will influence the network more than lesser cited journals.

-- Journal self-citation excluded

Article Influence determines the average influence of a journal's articles over the first five years after publication. It is calculated by dividing a journal's Eigenfactor Score by the number of articles in the journal, normalized as a fraction of all articles in all publications. The mean *Article Influence* Score is 1.00.

JOURNAL CITATION REPORTS

Exercise 1. View a Group of Journal by Subject category: **“SURGERY”**

1. How many journal in this subject category?
2. Which journal with the highest impact factor (IF)? [[sorted by IF](#)]
3. What is the **aggregate Impact Factor** of this subject category? [[view category summary list](#)]
4. Which journal **ranked 2nd in terms of Eigenfactor** score? [[sorted by Eigenfactor Score](#)]
5. What is the **Journal Self Cites rate to Years Used in Impact Factor Calculation for “Journal of Trauma”**? [[click on J Trauma](#)]
6. Which journal has the strongest relationship with “Journal of Trauma”? [[Related journals](#)]
7. **Ranking** of “Journal of Trauma” in this subject category [[Journal ranking](#)]

JOURNAL CITATION REPORTS

Exercise 2. Search with a specific journal title

Search Full Journal Title for 'ENERGY EDUCATION SCIENCE AND TECHNOLOGY'

1. What is the **Impact Factor & Eigenfactor Score** of this journal?
2. What is the **Journal Self Cites rate to Years Used in Impact Factor Calculation?** [click on the hyperlink under **Abbreviated Journal Title**]
3. Who is the **publisher** of this journal?

Select a JCR edition and year:	Select an option:
<input checked="" type="radio"/> JCR Science Edition 2011 ▼	<input type="radio"/> View a group of journals by Subject Category ▼
<input type="radio"/> JCR Social Sciences Edition 2011 ▼	<input checked="" type="radio"/> Search for a specific journal
	<input type="radio"/> View all journals
<input type="button" value="SUBMIT"/>	

1) Search by:	2) Type search term:
Full Journal Title ▼	Enter words from journal title or ISSN (view list of full journal titles)
	ENERGY EDUCATION SCIENCE AND TECH
	<input type="button" value="SEARCH"/>

Search Examples:

Full Journal Title: Enter JOURNAL OF CELLULAR PHYSIOLOGY or JOURNAL OF CELL* ([more examples](#))

Abbreviated Journal Title: Enter J CELL PHYSIOL or J CELL* ([more examples](#))

Title Word: Enter CELLULAR or CELL* ([more examples](#))

ISSN: Enter 0021-9541 or other ISSN ([more examples](#))

USING JOURNAL CITATION REPORTS WISELY

You should not depend solely on citation data of your journal evaluations.

Citation data are not meant to replace informed peer review. Careful attention should be paid to the many conditions that can influence citation rates such as language, journal history and format, publication schedule, and subject specialty.

SCIMAGO JOURNAL RANKING

- Journals indexed in Scopus
- Refreshed twice a year
- Freely accessible
- Main indicator: SJR, h-index

SCIMAGO JOURNAL RANKING

SCImago Journal & Country Rank

<http://www.scimagojr.com/journalrank.php>

The **SCImago Journal & Country Rank** is a portal that includes the journals and country scientific indicators developed from the information contained in the Scopus® database

27 major thematic categories, 313 specific subject categories

SCIMAGO JOURNAL RANKING

SJR (SCImago Journal Rank) indicator

It expresses the average number of **weighted citations** received in the selected year by the documents published in the selected journal in the three previous years

It measures the scientific influence of the average article in a journal

h-index

It expresses the journal's number of articles (h) that have received at least h citations. It quantifies both journal scientific productivity and scientific impact

International Collaboration:

Document ratio whose affiliation includes more than one country address

FAQ

ABOUT SCOPUS

The academic community has long been demanding more transparency, choice and accuracy in journal assessment. Currently, the majority of academic output is evaluated based on a single ranking of journal impact. Bibliometricians have been exploring new methods to provide deeper insight. Within the field of journal evaluation, two of the most exciting are Source Normalized Impact per Paper (SNIP) and SCImago Journal Rank (SJR), those values are provided here free of charge.

Journal Metrics November release: Introducing the world first rolling year journal metric calculation for 2011!

On November 10, refreshed journal metrics for SNIP and SJR were released. The normal release schedule for SNIP and SJR used to be a bi-yearly one. This is the first release that now includes the world first rolling year metric for SNIP and SJR.

This rolling metric is introduced based on extensive user feedback indicating the wish for having the highest metric currency possible. We're now able to publish a metric for 2011 even though 2011 is not yet completed. The 2011 metric will be based on a complete year's Scopus data from 1 June 2010 to 31 May 2011. There is a 3 month difference between data loading in Scopus and final publishing in Scopus and on Journal Metrics.com. The metrics for 1999-2010 are calendar year metrics as normal.

About Journal Metrics

Journal Search

Search the entire collection of journals covered by Scopus along with their SNIP and SJR metrics going back to 2007.

Enter one or more terms from the journal title (s), e.g. gene, america journal, etc.
