Comparison on teachers' conception of STEM Education

Conception of STEM Education

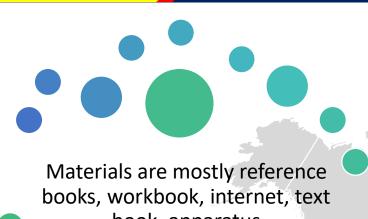

- Definition
- Execution
- Implication
- Mindset

DEFINITION

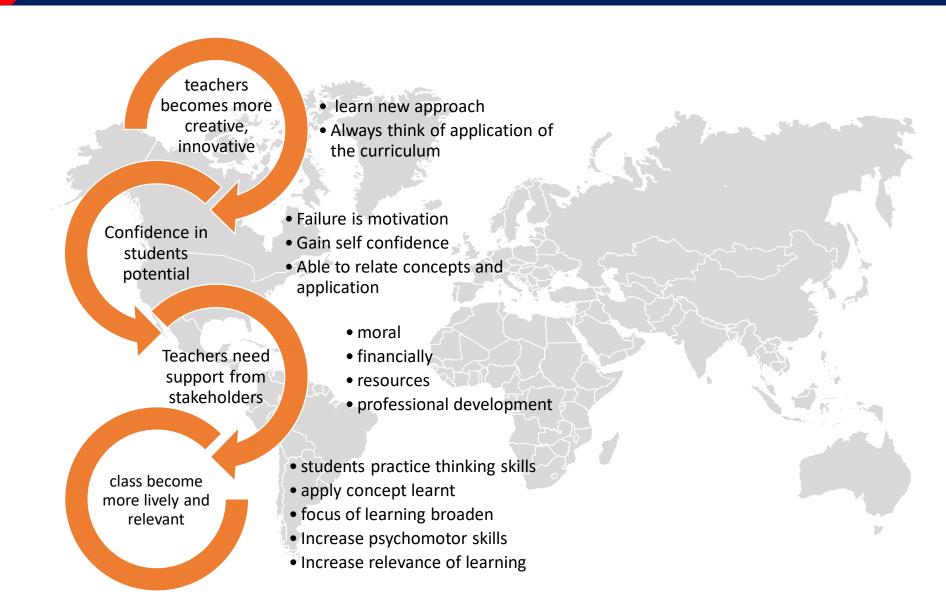

book, apparatus

- only in class, hands on mostly doing experiments
- relate with daily life
- Contructivism
- Aim-disseminate knowledge and pass examination

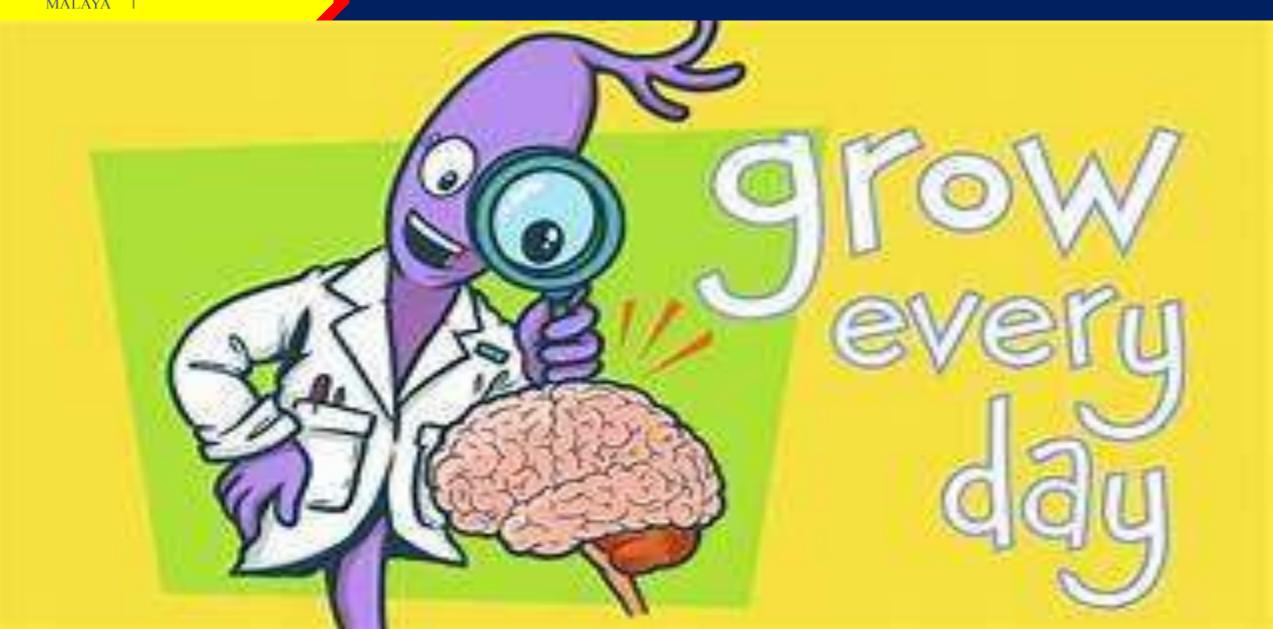

A lot of preparation from teacher, planning very important, activity based, inquiry based, teacher need input, need to be creative

- in class, extra curricular, after school program, out of school program, a lot of hands on, practice the scientific skills,
- facilitating skills important
- based on SDG (real world problem)
- Combination of constructivism and constructionism
- Aim solve problem

implication

mindset
