#### “RESOLUTIONS

Amongst the significant resolutions recommended by the Conference are the following:

(i) *Library Education and Training.* This Conference recommends that an ASEAN cooperative training programme in the form of courses and in-service training in the fields of librarianship, documentation and archives be developed. A paper should be prepared and submitted to the appropriate authorities in the ASEAN secretariat in order to obtain financial support. The conference further recommends that the participating members of this conference take the initiative to submit this proposal to their appropriate authorities.

Noting the need for high-calibre library members in order to cope with new challenges facing libraries today, library education programmes should give greater emphasis on managerial subjects.

The university administrations be urged to have a committed policy of continuing staff development for academic and professional interests with a view to improving the management of libraries.

(ii) *Directory of Library Resources.* Recognizing the need for establishing a practical approach to cooperative usage of library, documentation and

archival resources, training and other facilities in ASEAN, this conference recommends that Yayasan Sabah initiate the compilation of a directory of such resources and facilities in ASEAN.

(iii) *Depository for University Publications.* Considering that university libraries need to strengthen their resources as a basis for greater cooperation, it is recommended that university libraries function as depositories for all publications generated by the universities concerned. To facilitate bilateral exchange, this conference further recommends that each university library prepare listings of such publications.

(iv) *ASEAN Library Newsletter.* This conference endorses in principle the concept of a newsletter for disseminating information on library, documentation and archival services in ASEAN and recommends that Yayasan Sabah be entrusted with the responsibility of launching this newsletter. It is further recommended that each participating member country designates a contributing editor for this purpose.

(v) *Conservation of Materials.* Noting the lack of sufficient programmes for conservation of archival and library materials in ASEAN and realising the importance of the need for conservation technology and facilities for archivists, librarians and documentalists, this conference recommends that Southeast Asian Regional Branch of the International Council of Archives (SARBICA) takes the initiative to seek UNESCO funding for the setting up of a Regional Conservation Laboratory and Training Centre.”

All these resolutions will be submitted to administrators and policy-makers in relevant ministries and departments in all the countries of ASEAN.
